

F2 Manager

Release note

Version 1.70.1

F2 Manager version 1.70.1 release note

Dear F2 user,

Welcome to release note 1.70.1 for cBrain F2 Manager.

In this version we have made improvements and fixed certain bugs in F2 Manager.

A summary of new and/or updated functionality and bug fixes is presented below.

- Improved certain Danish and German texts regarding annotations.
- Fixed a bug that caused the meeting title to overlap with the meeting time in the calendar view.
- Fixed a rare bug that caused F2 Manager to crash when selecting a record or an attachment in the meeting planner.
- Fixed a rare bug that caused F2 Manager to crash when marking an approval as seen.
- Fixed a bug that caused the last approval to remain in the list even after it had been processed and removed. If an attempt was made to process it again, the approval could cause F2 Manager to crash.
